WLTP and NEDC measured under the different methods. Therefore, there is a difference in the emission value on the specification chart. In accordance with the latest regulation, the figures of NEDC are retrieved through CO₂MPAS from WLTP figures, which is different from the previous NEDC measurement method.

*¹ Continuously Variable Transmission.

*² Measured by MITSUBISHI MOTORS CORPORATION. Your actual mileage will vary depending on how you drive and maintain your vehicle.

*³ Acceleration, fuel consumption and CO₂ values vary depending on equipment level.

Note: Hazardous driving may cause serious injury or vehicle damage. Please drive safely at all times.
